

來自韓國的感謝～

Leo Ip  
Director of  
Taiwan I-link Community Service Association

Dear Mr. Ip,

Before it is too late, I would like to thank you and all the members who were actively participating in our meeting in Taipei last week. I have witnessed great enthusiasm during the discussion on our efforts to create cleaner and healthier cyber environment. The impression I got from GIO Taiwan and representatives of different fields was that Taiwan is very much concerned with the adverse effects arousing in this digital age and doing its best to combat those newly emerging defacts. From what I have seen, I strongly believe that your various actions including Internet Content Rating system will entail succesful results.

It seems to me that what we are striving for is not merely a matter at hand but what we hope to be in the future. By sharing the same value, I believe, we have reached a certain point of agreement on necessity of our activities and strengthening of our cooperative relationship. Due to Internet's interconnectness and its capability to cross national boundaries more easily, we need to work together at the international level. In that sense, Int'l Conference on Digital Genesis was very succesful and it defintely has expanded our knowledge.

Again, thank you for inviting ICEC to have productive discussion with you and for all the heartwarming receptions. I-link Communitiy Service Association has been great in managing the conference. If there is a chance, ICEC will be happy to greet you in Seoul, Korea.

I take this opportunity to wish you all the best for the future, good health and a lot of satisfaction in your activities.

Sincerely yours,

Do-Byung Jeong  
Chief Executive of ICEC Korea
